OVERVIEW

- 23 Lisheen mine, Ireland
- 24 Mt Lyell mine, Australia
- 25 Iron Ore project, Liberia
- 26, 27 Konkola and Nchanga copper mines & Nchanga smelter, Zambia
- 28 Skorpion mine, Namibia
- 29 Black Mountain mine, South Africa
- 30 South Africa Block 1

Revenue by Geography

1 Asia others includes Sri Lanka, Bangladesh, Nepal and Pakistan.

2 Far East others includes a number of countries, primarily Korea, Thailand, Singapore and Mauritius.

3 Others include the United States, Australia, New Zealand and a number of countries that are not classified in the other available categories.

Copper p62

Our Zambia operations have one of the highest-grade large copper mines in the world. In India, we operate one of the lowest cost custom smelters in the world. Our Australian mines supply a part of the concentrate requirements of our Indian operations.

Key Strengths

- One of the largest high grade copper mines in the world at Konkola Deepes
- One of the lowest cost copper custom smelters in the world at Tuticorin, India

569kt

Production volumes

US\$219m

EBITDA (Copper India/Australia)

US\$257m

EBITDA (Copper Zambia)

Aluminium p66

We are the largest Aluminium producer in India, with strategically located large-scale assets including smelters, captive power plants and mines.

Key Strengths

- Efficient assets operating in the lower half of the global cost curve with purchased alumina and bauxite
- Operations located in the bauxite and coal rich regions in Eastern India

774kt

Production volumes

US\$214m

EBITDA

Power p70

We are one of the largest independent power producers in India.

Key Strengths

- 2,400MW power plant at Jharsuguda, India ramping-up
- Near-term growth from the new 1,980MW Talwandi Sabo plant in India

8,888m kWh
